## Comments

They are part of programming. They are ignored by python interpreter and are not executed.

Types.

1. Single line comment : starts with # symbol.
2. Multi line : ''' ''' & """ """

## Keywords

They are predefined words to perform a specific task. These are cannot be used as variable names & function names → identifiers.

Ex: if, else, for, while, return, True.. (35)

## Variable

A variable is a name used to store a value.

They are placeholders which holds any kind of value.

Rules : It can be uppercase & lowercase.

It can be single alphabet, string & alphanumeric.

It can be dual words as single variable but seperated with underscore.

- They can't be start with numbers, or any special character.

Input

It is the process of receiving data from the user.

input() function is used to accept input from the Keyboard.

By default, input() function returns the entered value as a string.

[4]:
```
v1 = input("Enter a value")
```

```
Enter a value 3
```

[5]:
```
v1
```

[5]:
```
'3'
```

type(v1)

[6]:
```
type(v1)
```

[6]:
```
str
```

[7]:
```
v2 = int(input("Enter a value"))
v2
```

```
Enter a value 5
```

[7]:
```
5
```

[8]:
```
type(v2)
```

[8]:
```
int
```

15]:
```
#sum of numbers
n1 = int(input("Enter n1 "))
n2 = int(input("Enter n2 "))

print(f"the sum of {n1} and {n2} is {n1+n2}")
#value = n1 + n2
#print(value)
```

```
Enter n1  5
Enter n2  3
the sum of 5 and 3 is 8
```

```python
#sum of numbers
n1 = int(input("Enter n1 "))
n2 = int(input("Enter n2 "))

print(f"the sum of {n1} and {n2} is {n1+n2}")
#value = n1 + n2
#print(value)
```

```
Enter n1  5
Enter n2  3
the sum of 5 and 3 is 8
```

```python
#calculate area of circle an area of traianle
#pi = 3.14
r = int(input("Enter a radius"))
result = pi*r*r
print("area of circle is ",result)
print(f"area of circle is {result:.2f}")
```

```
Enter a radius 3
area of circle is  28.259999999999998
area of circle is 28.26
```

```python
#area of trainle
b = float(input("Enter base"))
h = float(input("Enter height"))
print("the area of triangle is ",1/2 * b * h)
```

```
Enter base 3
Enter height 2
the area of triangle is  3.0
```
